DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 1-29 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The phrase "can be varied" renders the claim indefinite because it cannot be determined whether or not the exposures are varied between 1 and 9.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 9, 12, 14-16, 18-22, 26, and 27 are rejected under 35 U.S.C. 102(b) as being anticipated by Sommer et al., U.S. Patent No. 5,819,124.

Sommer discloses a "motion detector camera"(see FIGS. 1-3); a "housing"(see 12 and 22 of FIGS. 1 and 2 and see "housing" surrounding the elements in FIG. 3); a "camera mechanism located within a first section of the housing"(see 10 of FIGS. 1-3), "including a film advance mechanism..."(see col. 3, lines 65-67) and a "lens which is exposed on a front surface of the housing"(see 16 of FIGS. 1 and 2 and see "lens" of "camera mechanism" 10 in FIG. 3); a "motion detector..."(see 28 of FIGS. 1 and 2 and 52 and 54 of FIG. 3); a "flash..."(see 50 of FIG. 4); a "controller..."(see 32 of FIGS. 1 and 3 and 56 of FIG. 3); a "power supply"(see col. 3, lines 28-32 and see 58 of FIG. 3); a housing that includes a "ridge located above the lens"(see edge or "ridge" of opening of the housing above the lens of "camera mechanism" 10, where the lens projects through in FIG. 3); a housing that includes a "clear plastic shell"(see col. 3, lines 54-58); and a "remote control..."(see col. 4, lines 63-64). The method of "taking a picture" along with features and functions of the claimed elements are similarly met by the features and function of the above mentioned elements.

Allowable Subject Matter

1. Claims 1, 2, 4-8, and 23-25 are allowed.
2. Claims 10, 11, 13, 17, 28, and 29 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rochelle Blackman whose telephone number is (703) 308-2879. The examiner can normally be reached on M-F 8:00-4:30.
